- 

Among **Türkiye’s Leading Companies** in the Sustainable 500 Survey
- 

We Achieved Significant Success Among 250 Companies **in Equal Opportunities**
- 

Strong Performance in International CRIF Assessments

OUR 2024 PERFORMANCE IN FIGURES

OUR SUSTAINABILITY STRATEGY

The main focus of our sustainability strategy is the “Sustainable Living” approach, which is the sustainability motto and main commitment of our parent company Bakioğlu Holding. We support this approach with three main dimensions of sustainability: environmental, economic and social.

We add value to the economy through an innovative and sustainable production model
With the sustainable production model we adopt based on the circular economy principle, we build our processes on the axis of circularity and create long-term economic value.

We create sustainable solutions that provide social benefit
We prioritize the responsibility of adding value to society in all our activities and support the quality of life in society with our sustainable packaging solutions. Acting with a corporate citizenship approach, we work for social welfare with a focus on “value for people.”

We contribute to the future of our planet by reducing our environmental footprint
We act with the awareness that resources are limited on a global scale, regularly measure our environmental impacts and create concrete action plans to minimize them. At the same time, we are developing our climate strategies to contribute to Türkiye’s 2053 Net Zero Carbon Goal.

CORPORATE MEMBERSHIPS AND INITIATIVES WE SUPPORT

OUR SUSTAINABLE PRODUCTS

- 

Reborn Product Family
We offer 100% recyclable and high barrier PP and PE based packaging solutions with the **“Reborn Product Family”**. These products for various sectors such as food, hygiene, household cleaning and personal care are fully compliant with the European Union’s new PPWR (Packaging and Packaging Waste Regulation) regulations.
- 

Refill Packaging
With our **“Refill”** packaging designed for refilling, we aim to minimize waste generation in line with the “Reduce, Reuse, Recycle” principle, especially for liquid hygiene products.
- 

PapBorn Product Family
With our new **“PapBorn”** product family, we offer printed and laminated paper packaging solutions. With this product family, we support our sustainability vision with structures containing up to 100% paper.
